Festival of Learning Showcase

Facilitator(s): Ms Jacinta Berlingeri, Simulation Project Manager, Teaching and Learning, Faculty of Health Sciences

Strategic theme: Rich, interactive learning experience

Subject Title: Simulation Education iBook Resource

Contact Details: Jacinta Berlingeri x 9132  Jacinta.Berlingeri@curtin.edu.au

Brief Description:

Simulation is both a technique and an educational strategy aimed at recreating clinical scenarios which support learners to develop and improve essential skills. Simulation is an emerging educational tool with more and more advances in sophisticated technology enabling learners to step out of the classroom into a simulated environment where they can immerse themselves in realistic contexts and programs.

As a facilitator, the challenge is identifying if simulation is a good ‘fit’ with current teaching practices and how to identify if simulation is suitable for your teaching units.

The aim of the iBook, is to support you, the educator, facilitator or observer and guide you through your simulation activity to provide students with the optimal learning experience.

Benefits:

- An interactive, electronic resource that can be downloaded and used by staff throughout the University including on mobile devices
- A ‘how to’ guide on simulation implementation
- Useful references and resources for further information on simulation
- Browse, simply and easily to locate information on simulation when you need it.

Time/Day: Friday 20 March 2015; 11:30 – 12:00pm

Duration: 30 min

No. of Sessions: One

Venue: Building 401:Room 152

Special Requirements: Internet access; Audio Visual access – screen to demonstrate how to use the iBook
