Dr Hoe Lee - School of Occupational Therapy and Social Work, Faculty of Health Sciences

Synopsis:

Dr Lee, educator and occupational therapist, is a senior lecturer for the School of Occupational Therapy and Social Work. His scholarly teaching is built on 31 years’ clinical experience in Australia, Hong Kong and China. Recognised as a leader in occupational therapy education he has strong relationships with both national and international industry partners. His commitment to student centred learning is underpinned by his many years’ of experience as a clinician, a focus work-integrated-learning, and advanced clinical skills. He teaches across a range of subjects and is the unit co-ordinator for Othroses and Rehabilitation Science; a core unit in physical rehabilitation that provides advanced skills training for undergraduate and postgraduate students to meet professional accreditation requirements. His teaching is characterised by engaging, accessible, interactive and innovative teaching strategies combined with extensive resources. Dr Lee’s research interests and publications lie in various areas of occupational therapy services, but it is the clinical impact of his translation research in upper limb rehabilitation that inspires his students to adopt evidence-based practice. His teaching excellence has been recognised with an OLT Program Award (team member) (2011), a Curtin Student Guild Teaching Award (2012) and Curtin Health Science Teaching Award (2013).
