Associate Professor Lisa Tee is the Chair of the Pharmaceutical Biology and Chemistry Subject Committee as well as Pharmacology Stream Leader in the School of Pharmacy at Curtin University. Lisa commenced research in Clinical Pharmacology while undertaking her PhD at London University and has been actively engaged in teaching and research in Australia since 1986. Lisa’s teaching aims to empower students with the learning skills to understand difficult concepts and topics by approaching it in a systematic, logical and memorable way. She utilises 21st century learning tools and technology to empower students to engage effectively in this new wave of blended learning in higher education. Lisa created the MyCourseMap, an innovative visual interactive curriculum map to provide students with clear vision as they navigate through the complexity of their course. Through development of an upward spiral curriculum structure based on building a solid foundation in Pharmacology, students are inspired and challenged to achieve core competency in their application of drug knowledge to clinical practice. Lisa’s leadership and excellence in teaching led her to her appointment to register of expert for TEQSA, OLT assessor and recognition with ALTC excellence in teaching award 2011. Lisa’s mission statement is ‘Learning and Teaching with triple E: Energy, Enthusiasm and Empathy’.

Specialty areas of teaching

Enhancing pedagogy with technologies and innovative learning design, Gamification, Collaborative learning

Description of teaching to showcase to others

Pharmacology is a core subject which demands extensive and current knowledge of how drugs work in the body. Medical and Health Science students see Pharmacology as one of the most challenging and complex subjects in their course. To achieve this Lisa uses a series of interactive and captivating techniques involving gamification (Speedy Drug Challenge, Drug Bingo) and collaborative learning through speed dating to enhance understanding of complex concepts.

Open Door availability

Unit: Pharmacology for Pharmacists 2
Times Available: TBC for 2016
Dates Available: TBC for 2016
Location of Session: TBC for 2016
Maximum available visitor number: 2
Available for consultation: Directly after this session and can also be negotiated

Unit: Applied Pharmacology for Pharmacists
Times Available: TBC for 2016
Dates Available: TBC for 2016
Location of Session: TBC for 2016
Maximum available visitor number: 2
Available for consultation: Directly after this session and can also be negotiated
