Radiography

Editor-in-Chief: Julie Nightingale
View Editorial Board
Supports Open Access

Radiography is the official peer-reviewed journal of the Society and College of Radiographers and the European Federation of Radiographer Societies.

Radiography promotes evidence-based practice by disseminating high quality clinical, scientific and educational research related to all aspects of diagnostic and therapeutic radiography. We publish research articles, systematic and narrative reviews, editorials and letters of international relevance that advance knowledge and encourage innovation within radiography.

Radiography is essential reading for researchers and practitioners (diagnostic and therapeutic) in radiography. The journal also aims to further the aims of the Society and the College of Radiographers.

Open Access Guidance Document

Curtin is recognised for applied and practical research, focused on solving real-world problems. To maximise the impact and ensure the research benefits the broader community locally, nationally and globally, findings of the research should be disseminated as broadly as possible.

Materials published in open access journals or digital research repositories can be accessed without barriers by anyone via the Internet. The term open access describes the nature of access, rather than a specific business model, licence or type of content. Within scholarly publishing, open access refers to material that is:

- Online and digital
- Without cost to access
- Peer reviewed research
- Compliant with copyright legislation
- Free of access barriers created by financial, legal or technical issues.

Research made available through open access has the greatest potential audience that includes government agencies, policy makers, practitioners, charities and non-government organisations, industry and business and the general public. The increased visibility and reach of open access material can contribute to maximising the impact of the research.
Publish in open access journals. Paper available OA via publisher’s website (may charge APC)

Published in subscription journals and deposit a version of your paper in espace
espace

Curtin’s institutional repository, espace, is an open access digital collection containing the research output of Curtin staff and students. Included are theses, journal articles, conference papers, book chapters and more. espace preserves Curtin’s research output and increases its exposure and impact by making it visible and freely available through services such as Google, Trove and OAIster.

Roosevelt Island 2012/2013 1.5 m snow pit data set

Curtin University
Aja Ellis (Aggregate by) Barbara Delmonte (Aggregate by) Per Andersson (Aggregate by) Ross Edwards (Aggregate by) Victoria Winton (Aggregate by) View all 11 related researchers

Full description

This data set contains dissolved and total dissolved Fe, Al, S and Na concentrations, dust and black carbon concentrations and Sr and Nd isotopic ratios and concentrations for the RICE 2012/2013 1.5 m snow pit. Methods for analysis can be found in the publication. Citation below. The snow pit was sampled in November 2012 at Roosevelt Island as part of the Roosevelt Island Climate Evolution (RICE) ice core drilling program.

Data time period: 2012 to 2013

United States Health Care Reform: Progress to Date and Next Steps
Overview of attention for article published in JAMA: Journal of the American Medical Association, July 2016

This research output has an Altmetric Attention Score of 8298. This is our high-level measure of the quality and quantity of online attention that it has received. This Attention Score, as well as the ranking and number of research outputs shown below, was calculated when the research output was last mentioned on 10 June 2017.

Altmetric has tracked 7,886,756 research outputs across all sources so far. Compared to these this one has done particularly well and is in the 99th percentile: it's in the top 5% of all research outputs ever tracked by Altmetric.
United States Health Care Reform: Progress to Date and Next Steps

Overview of attention for article published in JAMA: Journal of the American Medical Association, July 2016

So far, Altmetric has seen 9052 tweets from 8187 users, with an upper bound of 38,273,820 followers.
